## New CCAF Public Health Technology Degree

From our friends at ECI:

Effective February 1, 1998, the degree program for 4EXXX personnel will be Public Health Technology (7ECY). The last day for enrollment in their current program, Environmental Medicine Technology, (7GAO), is January 31, 1998.

The following statements provide guidance for current and new students.

- Effective February 1, 1998, newly registered students, to include six year rolls, will automatically be enrolled in the Public Health Technology degree program. There will be no option to enroll in Environmental Medicine Technology.
- Students currently enrolled in Environmental Medicine Technology have two options:
  - Remain in this program until they graduate or they reach their six year roll date, whichever comes first.
  - Request enrollment in Public Health Technology. Once enrolled in the new program, they cannot go back to Environmental Medicine Technology.
- Students can receive a degree in Public Health Technology OR in Environmental Medicine Technology BUT NOT IN BOTH.

NOTE: The only difference between the two degrees is the title - technical requirements did not change. The new title complements the career field specialty nomenclature.
